

## Universal Product Code

= HARTH, Winter MW

Each clue has two parts. The first part is a number equal to the product of the numerical values of its letters (A = 1, B = 2, etc. For example, the word CODE would yield  $3 \times 15 \times 4 \times 5 = 900$ .) The second part is a hint using some kind of word play.

### Across

1. 744,323,580: No flavoring for sloe gin.
6. 2,653,560: I am in a cod. (Two words.)
7. 126: Stirred with a tub, yields a vegetable.
8. 9450: Beef, lamb, or ham are probably not on his shopping list.
10. 128,701,440: No bananas.
11. 133,380,000: Separate spirits from meat.

### Down

1. 172,730,880: Origin of beef, lamb, or ham.
2. 653,360,904: For those who don't like canned juice, a better choice...
3. 53,130: Cayenne --ouch!
4. 1,500,282,000: Got coin in change.
5. 1,819,440,000: Like bee lam. Ha!
9. 24,700: Strawberry, etc., going up.
